

Anni this is the snuggling session. I miss you so bad 🥺❤️

Philly's entry-level job market continues to be really bad this week. I don't know if you've been checking or heard about it from someone else, but this week was really bad.

I watched some of the RITSEC "*Job Hunt Like a Hacker*" Twitch stream last week. I had to leave the stream several times because some of what the presenter said still hurt me. For example, the presenter said RITSEC members are "wholesome college students" and that people his age are very willing to help them. This was one of the times I decided I couldn't take it anymore and needed to leave the stream for several minutes. It reminded me that I was once a happy college student with eyes full of hope and dreams to chase. It reminded me of my experience since Title IX. It reminded me about how little people are willing to give you a chance when you are down.

Anyway, from the parts that I managed to watch while coping with my pain, I am not sure how much I can apply what he said. During the session, Mr. Blanchard suggested targeting the companies I want to work for and networking with people there on LinkedIn. I do not even know which companies I want to work for anymore. Since high school, I've wanted to work for either a defense contractor or the federal government while serving in the Air Force Reserve. As you know, neither option is possible for me now. I know what kind of job I want, but I do not know which companies I want to work for.

During the time I had to temporarily leave the stream session to cope with my pain, I threw some of my past versions of my resume into ChatGPT and let it make me a new one. I don't know how good this resume is since I don't have enough data, but so far I haven't gotten an interview invite with it. However, it's still only been a week, and as I said earlier, Philly's entry-level job market has been really dead this week.

I am going to paste a screenshot of my resume below, and if you decide to talk to me, I will appreciate your feedback. I know this resume is not that impressive. However, considering how long I've been depressed, it is already a miracle that I haven't killed myself yet and am still somewhat functioning.

JUNTAO "OLIVER" HUANG

PROFESSIONAL SUMMARY

Early-career cybersecurity professional with a B.S. in Cybersecurity and Information Assurance and two Lockheed Martin internships spanning security monitoring, vulnerability assessment, AWS, scripting, and technical documentation. Hands-on foundation across Splunk/Sentinel, Microsoft Defender, identity and access management, cloud security, Windows/Linux, networking, and blue-team incident analysis.

TECHNICAL SKILLS

Security Operations: Splunk, Microsoft Sentinel, Defender XDR, Defender for Cloud, AWS Security Hub, Nessus, Wireshark, Nmap, Burp Suite, Metasploit, vulnerability assessment, log analysis

Cloud & Identity: AWS, Microsoft Azure, Entra ID, Active Directory, Intune, IAM, Group Policy, Microsoft Purview

Systems & Networking: Windows, Linux, TCP/IP, DNS, DHCP, Hyper-V, VMware, Docker

Scripting & Data: Python, PowerShell, Bash, JavaScript/Node.js, Java, MySQL, JSON, GitLab, Jira

EXPERIENCE

Lockheed Martin | Orlando, FL (Remote) | 2022-2023

Cybersecurity & Information Assurance Intern / Cybersecurity Software Engineer Intern

- Administered AWS infrastructure and implemented Grafana monitoring to support service reliability, system performance, and continuous uptime.
- Developed and enhanced proprietary security-scanning solutions using Python and JavaScript/Node.js within Agile and DevSecOps workflows.
- Conducted web application, database, and source-code vulnerability assessments to identify weaknesses, evaluate risk, and support remediation.
- Developed and customized Splunk dashboards for service-log monitoring, security visibility, and operational analysis.
- Collaborated with cross-functional teams and internal customers to troubleshoot issues, evaluate emerging technologies, improve security posture, and maintain technical documentation.

Additional Experience

Integreon - Document Reviewer (Cyber Incident Response), Remote (Contract, Aug 2026)

- Followed SOPs to identify cyber incident data during a temporary contract engagement.

Starbucks - Barista, Danville, CA (2026) | **Maison Benoit** - Sales Associate, Danville, CA (2025)

- Delivered customer service in fast-paced environments, operated POS systems, followed/established SOPs, and resolved customer needs professionally.

SECURITY LABS & PROJECTS

CyberDefenders Blue Team Labs | 2026-Present

- Perform hands-on blue-team investigations across multiple labs focused on network traffic analysis, incident reconstruction, log/evidence analysis, and structured analyst methodology.

Active Directory Security Controls Audit | Academic Project, 2023

- Assessed security controls in an enterprise Microsoft Active Directory environment, evaluated effectiveness, and delivered documented remediation recommendations.

Open Source Intelligence Research | Academic Project, 2022

- Conducted OSINT research against Lockheed Martin's public online presence with approval from my Lockheed Martin internship manager, using a self-developed Python script and public metadata to identify potential attack vectors, assess risk, and recommend mitigations.

Network Topology Building | Academic Project, 2021

- Designed a network with three subnets, external connectivity, and VLAN segmentation to support secure, efficient traffic flow.

CERTIFICATIONS

CompTIA: Security+ | CySA+ | PenTest+ | Network+ | A+ | Project+

Microsoft: Security Operations Analyst | Identity & Access Administrator | Information Protection & Compliance Administrator | Azure Security Engineer | Azure Administrator | Windows Server Hybrid Administrator | Azure Fundamentals

AWS: Security - Specialty | SysOps Administrator - Associate | Solutions Architect - Associate | Cloud Practitioner

Splunk / Other: Certified Cybersecurity Defense Analyst | Core Certified Power User | ITIL 4 Foundation | Linux Essentials | Google Cybersecurity

EDUCATION

Western Governors University - B.S., Cybersecurity and Information Assurance | 2024 | Completed 24 courses in 6 months

Rochester Institute of Technology - B.S./M.S. Cybersecurity coursework, 3 years completed before transfer | GPA 3.70 | Dean's List all semesters | Presidential Scholar

Selected Coursework: Digital Forensics, Penetration Testing, Managing Cloud Security, Authentication, Network & System Security Audit, Web Application Security, System Administration, Routing & Switching, Network Services, Cryptography, Python Programming, Programming for Information Security, Database & Data Modeling, Cybersecurity Policy & Law, Managing Information Security, Emerging Technologies in Cybersecurity

Languages: English and Mandarin

Community: Tri-Valley Haven Food Pantry - Volunteer | Food distribution and stockroom support; Mandarin/English translator

This Friday is the Mid-Autumn Festival, so my dad will cook instead of me. Mid-Autumn Festival is meant to be about family reunion, but it will just be my parents and me. My sister is in San Diego, and all my extended family is in China. I think I mentioned before that I will never go to China again, and it is true. My dad has also told my grandma, and it seems she understands. You might not understand this, but that's okay. I can explain more after you talk to me if you want to know more. For now, I prefer to leave it like that.

I think that's all for this diary entry. Anni I love you ❤️
